

DMK 22 SBR

KRISS®

The DMK22 SBR is the optimal semi-automatic rimfire platform that allows for realistic training and limitless customization from end to end. Recognizing the need for low cost training and familiarization, KRISS USA Inc set out to design a rimfire rifle that replicates the form and function of centerfire AR15 pistols, while taking advantage of low cost .22 LR ammunition.

The patented barrel adapter allows DMK22 SBR to accept aftermarket 10/22 barrels to accommodate different performance needs. To accurately mimic AR15s, a functional, last round bolt catch is also include, which engages once ammunition in the DMK22 magazines has been expended. Popular .22 LR AR15 magazines may also be used, however the last round bolt catch only engages with KRISS DMK22 magazines.

Accessory compatibility:

Since the rifles are modeled after AR15s, many accessories currently available in the market such as triggers, charging handles, selectors, handguards, and other parts may be installed. This is especially useful when configuring a DMK22 SBR identically to a duty/home defense AR15.

INCLUDES:

- > Patented Ruger® 10/22 barrel compatibility
- > Patented last round bolt lock
- > Low profile folding sights
- > Aluminum upper and lower receivers
- > Aluminum free float M-LOK handguard
- > 6 position M4 stock

CERAKOTE® COLOR OPTIONS:

Model	Caliber	Magazine Capacity	Frame Material	Barrel Length	Overall Length (Collapsed / Extended)	Height	Width	Weight (Unloaded)
